Ultra Core Wick	Even Curl Wick	Even Curl Wick	Even Curl Wick
Rigid Curl Wick	Rigid Curl Wick		Rigid Curl Wick
Cotton Core Wick			Ultra Core Wick
Zinc Core Wick			Cotton Core Wick

Fil-Tec's unique knitted candlewick produces great burn performance in all types of waxes. Try one of these candlewick styles to improve your candles' burn:

**ULTRA CORE:** The 100% fiber wick that has outstanding rigidity, standing straight during the fill and the burn. It performs well in container, votive and pillar candles.

**RIGID CURL:** The 100% fiber wick that is rigid and self-trimming. It stays straight during the fill and curls in the flame. It is designed for container, votive and pillar candles; where carbon cap and mushroom reduction is desired.

**EVEN CURL:** The most consistently curling and self-trimming wick available anywhere. Gives you great performance in extruded and molded candle sticks as well as all types of pillars and tapers.

**COTTON CORE:** A 100% cotton wick designed with our unique knitted structure to facilitate burning in even the toughest waxes and heaviest fragrance loads. Use for container candles.

**ZINC CORE:** A rigid wick with our open knit construction stiffened with a zinc wire core. The ultimate in rigidity and stability for all types of filled container candles where metal wire is not a concern.
