

Cotton Core XL & Ultra Core XL Candlewick

Fil-Tec's XL cored wick is a larger wick that features an open construction design enabling better capillary flow of more difficult wax blends such as vegetable or soy based and heavily scented or colored paraffin. The Ultra Core XL is designed with a special filament core to give the candle maker the rigidity they need during the wax pour.

Our product description is very "user-friendly". The description represents the 4 hour pool diameter in a 140° melt point straight cut paraffin wax. This method allows the user to easily compare wick size and performance. This chart provides the candle maker a starting point for wick selection. Your wick selection will depend on wax blend, color and scent additives.
